Armistice Day -- 10 p.m.

Mr. E. A. Kirkwood in charge of musical programme.

Dems. Lead In 42 States and Have Control Congress

Calgary Herald Bulletin.

Returns compiled by the Associated Press up to 1:45 p.m. (E.S.T.) show totals which it burns out by later figures would give the following electoral vote: Roosevelt, 472. Hoover, 59. Necessary to elect, 266.

(By Cecil B. Dickson, Associated Press Staff Writer, in Calgary Herald.)

Washington, Nov. 9. -- Mowing down their opponents on many fronts, the Democrats today were in complete control of the United States 73rd congress.

The tidal wave of votes that swept Franklin D. Roosevelt into the president's chair also gave him a Democratic-dominated national assembly with which to work.

In the House of Representatives incomplete returns indicate a possible Democratic majority of between fifty and one hundred.

Several Republican governors, many members of the Senate and House and numerous other G.O. P. office holders are now looking for jobs.

The anti-prohibition drive continues to increase in strength both in the new Congress and state legislatures.

Heathdale Happenings.

Mr and Mrs. H. R. King motored to Drumheller on Saturday and returned home Monday. While in Drumheller they were the guests of Mrs. Mitchell and Mrs. Cochrane. Miss Royal Mitchell returned with them for a week's vacation.

Mr and Mrs. W. E. Anderson motored to Drumheller on Saturday.

Wm Pearson spent the weekend at the home of A. J. Robson.

Mr and Mrs. James Ferguson, Miss Katherine Ferguson, Miss Myrtle Brotherson and Benj Ferguson were Sunday guests at the home of Mr and Mrs. Geo. Ferguson.

Rearville News.

The whist drive and dance held at Rearville school on October 4th was quite successful. Mrs. Cranshaw and A. Stephens were winners of firsts, while Mrs. Suiter and C. Hodge were winners of the consolation prizes. Tom Watson with the saxophone and Clarence Segur with the drums supplied peppy music for the dance. Good Coffee was served, as Mrs. Osterberg is again able to attend such entertainments.

Nation - Wide Strike of All Farmers Advocated

(Special Dispatch to the Calgary Herald.)

Rumsey, Alberta, Nov. 5. -- Demands for a nation wide strike of Canadian farmers to take place before the 1933 seeding season were made at a mass meeting of wheat growers in the U.F.A. hall here. Refusal to seed wheat, in the coming season was advocated and a resolution agreeing to tie up seeding in the district was unanimously adopted.

More than 90 per cent of local growers were present at the meeting which demanded government guarantees to cover the cost of production of 1933 crops. Farmers in Alberta, Saskatchewan and Manitoba will be advised of the action taken and invited to co-operate.

The meeting displayed an angry mood and the chairman, John McNaughton, had considerable difficulty in maintaining order. Speakers claimed that the position of farmers in the west was rapidly becoming desperate.

In a further resolution, unanimously carried, the federal government was condemned for its rejection of G. G. Doot's motion to connect the Canadian dollar with the pound sterling, and it was asked that the whole question be reconsidered.

Further meetings will be held in two weeks' time to report progress made in lining up for the strike, when reports will be received from all districts.

British Pilots Seek New Distance Mark

(Associated Press in Calgary Herald.)

Cranwell, England, Nov. 8. In an effort to break the Boardman-Palando non-stop aviation distance record of 5,039.5 miles, two Royal Air Force pilots on Tuesday planned to leave the flying field here at dawn Wednesday for British South Africa.

The fliers are Squadron Leader O. R. Gifford and Flight Lieutenant D. L. G. Bett, and they will use the same long-distance monoplane in which they made the first non-stop flight from England to Egypt in 1931.

District Meeting No. 14. A.F. & A.M.

The District Meeting of District No. 14, A.F. & A.M., was held in Chinook on Nov. 3rd. The district was well represented, there being about ninety present. R. Wor. Brother J. W. Lawrence, D.D.G.M., had charge of the

meeting, and was assisted by Grand Lodge officers in the persons of M. Wor. Bro. Geo. M. Blackstock, Medicine Hat, Grand Master; M. Wor. Bro. J. H. W. S. Kemmis, Grand Secretary, Calgary; and M. Wor. Bro. W. M. Connacher, Calgary. The principal speakers were the Grand Lodge officers. During the evening session Wor. Bro. Chas. Demford was chosen as the incoming D.D.G.M.

The banquet, in the school hall, was in charge of the ladies of the Women's Institute, and was in the nature of a turkey dinner, and from comments heard was highly satisfactory in every respect.

Young People's Society Met

The Young People's Society met Wednesday for a "Guy

Fawkes" social. As an initiation to the weird evening each member on arriving was asked to "follow the string," which led them through a maze of surprises both gruesome and mirthful.

Then the lights were turned on and under the leadership of Mr. Youell, a devotional service was held, followed by a short business meeting. The remainder of the evening was spent in playing games, after which a dainty lunch was served.

A hearty hand clap was given to the committee in charge.

Funeral of Mr. Peters.

The funeral service for Mr. Peters was held Thursday, Nov. 3rd, in the United Church, Rev. Mr. Martens, Mennonite minister, officiated. Burial service took place at Chinook Cemetery.

Inter-Provincial Ploughing Match Held At Ottawa Was Attended By Thousands Of Spectators

It would seem that the present generation have by no means lost veneration for the oldest of all industries—the tilling of the soil—and a demonstration of how this ancient history should be done in this day and generation can attract crowds as large as attend big league baseball or football games. An inter-provincial ploughing match was held recently at the Canadian Government Central Experimental Farm, on the outskirts of Ottawa, and many thousands attended to watch the competitive events during the four days the meet was held. On the last day more than 10,000 persons were present to see the finish of the final contests, when furrows were ploughed from one end to the other of the large field, as straight as a gun barrel. This ploughing match, which was open to horse and tractor ploughs, demonstrated that the farm horse is by no means on the way to join the Dodo or the Great Auk; indeed, the consensus among farmer folk is that the farm horse is steadily plodding his way back towards the plane of his former popularity.

The Inter-Provincial Ploughing match was formally opened by His Excellency the Earl of Bessborough, Governor-General of Canada, who tried his hand at ploughing a long, clean, straight furrow and made a good showing for an amateur. The ploughs used in the contests were naturally a substantial improvement on the first cast iron plough made in Canada more than 100 years ago. This distinction of making that implement belongs to Ezerias Parsons, a native of Lisle, Bromo County, New York. In 1824 he moved to Chippawa, Ontario, near Niagara Falls. He was poor, but had an idea that cast-iron ploughs would be more serviceable than those of wood and wrought iron, which were then in general use. He gathered together scrap iron, constructed a rude furnace and cast three ploughs, which proved to be models of lightness and durability. The demand for his ploughs soon became great. In 1827 he died at the age of 38 years. His business was carried on by a son, M. Parsons. In three years Parsons made a net profit on the sale of his ploughs of \$6,000.

Birds Prove Menace To Sheep

Magpies Destroy Young Lambs In British Columbia

Brutal methods employed by magpies to secure food among the large flocks of sheep and lambs during spring are disclosed by A. Bryan Williams, British Columbia game commissioner, in his annual report.

When the lambs are only a few hours old the voracious magpies peck out their eyes, leaving them blind and helpless to die in agony. Then the birds feast on their young, tender lamb.

Bounties were paid on 3,427 magpies and wardens killed an additional 3,358, a total of 6,785 last year, but the birds do not appear to be greatly diminished in number.

The commissioner recommends the total extinction of magpies and crows, the latter being almost as bad as magpies. Wardens shot 5,700 crows last year, also 51 eagles, 302 hawks, and 150 owls.

Mr. Williams describes wild domestic cats as a real menace. Domestic cats are resourceful in the wilds and quickly learn how to subsist on wild life. Young game birds and chickens fall easy prey to the cats.

Italian Sailor Was Brave

Saved Submarine Crew With Great Danger To Himself

Sailor Giuseppe Valentano got a silver medal because he thought of others and forgot himself. The submarine N-6, the award disclosed, started to go down with the conning tower open off Toronto. Valentano, in the tower at the time, leaped to the deck and closed the hatch, from the outside. He was left adrift in the ocean and was nearly dead when picked up. The submarine later returned safely to the surface.

"What is ignorance?" asked Johnny's teacher.

"It's when you don't know something, and somebody finds it out," came the immediate reply.

Russia's population has grown 3,000,000 in the last year.

The steel industry has developed 1,600 kinds of alloy steel.

W. N. T. 1907

Receives Faraday Medal

Award Given In London To Sir Oliver Lodge

Sir Oliver Lodge has been fittingly honored by the presentation of the Faraday Medal, which was made at the Institution of Electrical Engineers, in London, England. It was the 11th award of the medal, which was founded in 1921, and was awarded to him in recognition of his distinguished services towards the advancement of science. Sir Oliver remembers hearing Graham Bell when he went over to England with the first telephone and explained it to British scientists, and recounted to the gathering the scepticism it aroused. He is now in his 81st year, having been born at Penkull, Staffordshire, on June 12, 1851.

Road To Longer Life

Scientist Claims Way To Better Health Depends On Food Values

The newest road to longer life and better health for man leads through his stomach. Latest scientific study of nourishment value of foods show it is possible to extend the average length of life and better health of the human race by improving diet. So Dr. H. C. Sherman of Columbia University told the American Public Health Association.

Liked Canada's Ice Cream

British People Would Like To Have It Often

Writing in the Edinburgh Scotsman, "A Woman Journalist" says it is a pity, with all these negotiations at Ottawa, that something could not be done about ice cream. A friend, just home from Ottawa, tells me that he hardly know the meaning of the words on this side. He gave mouth-watering accounts of the slabs of delectable ice cream which he was served at every meal. Maybe he exaggerated, but it is a much more frequent item on the Canadian menu than it has ever been with us. "And it is real ice cream, mind you—none of your condensed milk mixtures. It is like silk on the tongue, he says, and factory made. At 25 cents a slab, it is a palatable, economical, and nourishing addition to the diet. What I begin to visualize is an ice cream flying corps. Picture a band of girl flyers in white uniforms sailing across the skies in a silvery flying machine, bearing quarts upon quarts of rich ice cream to waiting customers on this side of the water. They'd eat it all on the way over!" suggests someone—an unkind criticism of a really bright proposal.

Lives On Lonely Island

Modern Robinson Crusoe Is Discovered Off Chilean Coast

A new Robinson Crusoe, who shuns rescue, has been found on an island off the Chilean coast.

Sailors of the French vessel "Tolosa," who landed on Rincia Island seeking water, said they followed footprints and surprised a man covered with goat skins in a semi-savage manner.

Federico Lavarriere, one of the sailors, tried to talk to him, but he answered in guttural sounds, as though he had forgotten his language. By signs, the sailors induced him to lead them to a hidden source of water.

On leaving, they invited him to go along, but he took one look at the ship and fled into the bush.

It was on Juan Fernandez Island off the central part of Chile that Alexander Selkirk, the prototype of "Robinson Crusoe," lived.

Girls Run Irish Factory

Govern Working Conditions and Decide Wages and Hours

The cheerful clack of machinery bids defiance to depression in a Dublin factory, which is run by 170 working girls.

Situated in a humble street, the factory exists only for the manufacture of rosary beads. The proprietor is a grand nephew of the famous Irish patriot and author, John Mitchell.

The business is unique in Ireland. The girls who work in the factory elect a council every year, and they decide wages, hours and working conditions. They know the profit and expenses and they see the books. Each girl has as much of a vote as the proprietor.

The hooves of nearly every head of cattle slaughtered in Ireland come to the little mill in Waterford Street. High speed machinery turns them into the horn beads that have a sale the world over.

Profits are substantial, working conditions satisfactory. The girls say they are happy.

Alfalfa Makes Good Pasture

Not Necessary For Farmer To Harvest Second Crop

One heard a man say that he did not grow alfalfa, because "it makes too much hay." Sometimes we think he was right. Ordinarily it is a fine thing to get a second and a third cut of alfalfa, but the best hay-making season is over when they come and curing is often a problem.

This year, after taking off 400 loads of hay, we were not at all enthusiastic about a second cut. We had four fields that would have yielded another crop, but only two of them were harvested.

—The smallest—and we made ourselves think that the other two were needed for pasture, as indeed they were for the pasture season was only half over at the time. Farmers rarely have too much pasture, and the live stock will usually take care of any second or third cutting that a weary farmer does not care to harvest.

Where alfalfa will grow there is no sound argument against it.—Farmer's Advocate.

+ Do You Know? +

—THAT the relentless force of the Bulkley River in northern British Columbia has cut a channel through a wall of solid rock 150 feet high and 8 feet thick? The Bulkley Gate as it is called is seen in the photograph standing like the uncompleted masonry of man.

New Process Being Perfected For Producing Synthetic Lumber Stronger Than Natural Product

New Style In Eggs

Pure White Shells and Pale Yellow Yolks Now Correct

When we speak of good taste in eggs we usually mean gustatory, or at least, olfactory taste. But butter and egg men declare the visual taste is the selling appeal in eggs, new-laid eggs, fresh eggs—or eggs. Hens are, perhaps, more concerned than is the public in the announcement that correct style in eggs from the poultry yard this coming winter demands pure white shells and pale yellow yolks. L. B. Kilbourne, president of the United States Egg Men's Association, is quoted as authority for that dictum, which makes it evident that esthetic considerations enter into the marketing of eggs. Of course, we Canadians have so many protective laws and inspectors always working that our eggs must be always in good taste for breakfast table manners. At least, legally, no unwarranted egg can enter a home unless duly branded according to class.

Still, we don't know where that Chicago expert gets his fashions for hens and their eggs. The egg public is not finicky except about the date of the package. The average egg appetite doesn't go by shells, beige tint, sun tan, or what not. A pallid yolk is not so worrisome as long as the period between the hen and the cup is moderately brief. However, the golden yellow of an egg is rather appetizing to even the less delicate, though a more egg-eater might not notice the warm pastel shades of the yolk, as it were. Then there is a considerable section of the egg's public with a strong leaning to the belief that stronger coloration of shell indicates richer and more nutritious content.

The chemistry persons deny that fancy. At the same time boarding house keepers who have factitious eggs bachelors to satisfy their white eggs in coffee and produce the beautiful rich warm tone natural to hen fruit of good taste. Moreover, the average egg consumer will never believe Chicago designers can decree a fashion in eggs—despite the depression.—Brandon Son.

The Pride Of London

Life Guards Have Gone Back To Old Quarters

The Life Guards are once again back at their old barracks quarters in Knightsbridge. They have been stationed there for about 200 years. Tradition was broken the other day when for various military reasons, the Knightsbridge barracks, the oldest in the country, were vacated by the mounted six-foot troopers and taken over by a battalion of Foot Guards. Strangely enough, it has been London's modern traffic conditions that have restored the Life Guards to their old home. They are much closer to Whitehall at Knightsbridge, and their daily progress to and from mounting guard at the old Whitehall tilt-yard offers less obstruction to the roaring motor traffic. It is said the orders posted up inside the Whitehall sentry-boxes where the Life Guards mount guard are identically the same as they were more than three centuries ago.

Canada's Flour Exports

Substantial Increase In Shipments To United Kingdom Is Expected

In 1931 Canada sent 2,225,490 barrels of flour to Great Britain out of a total importation by the British of 6,141,192 barrels. The United States sent 1,187,190 barrels. It is expected that Canada will increase substantially her exports of flour to the United Kingdom.

In 1931 Great Britain imported to the equivalent of 250,466,000 bushels of wheat. With the flour and wheat preference granted through the agreements, the wheat exports from Canada to the United Kingdom are expected to increase by many millions of bushels.

And as the wheat industry is one of the chief keystones of Canadian prosperity, the advantages granted wheat and flour are hoped to prove important factors in the national recovery.

A photograph taken at a recent social gathering in Scotland revealed that only one man was wearing a kiln, and he was an Englishman on his first visit to Scotland.

Nearly 1,000 building permits have been issued in Melbourne, Australia, this year.

Waiting 39 years or more for commercial lumber to grow on the stump is no longer necessary, a report by a professor in Iowa State College to the American Chemical Society says. Any wood that now grows in the forest can be duplicated out of the refuse from American farm crops—corn stalks and cobs, straw and bagasse. The hardest of this synthetic wood, according to the report, closely resembles teak in appearance, as well as in durability, density and strength, while its cross-breaking coefficient is nearly double that of teak and almost equal to that of common steel. Variations of the process of manufacture produce "wood" as light and friable as cork.

One advantage of this synthetic product is that it takes less weeks to produce than it takes years for trees to reach commercial size. Another is that it can be made out of the refuse from food crops. Still another advantage is that lamination synthetic lumber can be molded into various dimensions, which saves labor costs. A house can be built out of this material, says the Iowa professor, at about the cost of one built out of natural lumber and will be stronger and less expensive to heat, a result of its better insulation. The cost of producing the hardest of this synthetic building material however is approximately \$250 a ton, which seems for the time being to place it out of competition with forest products. As timber becomes scarcer and consequently more costly, and the methods of manufacturing synthetic wood are improved and thereby cheapened, this discrepancy in costs may be expected to diminish and ultimately disappear.

Again chemistry has come to the aid of Nature and man. When the first ax was sunk into the primeval forest of America, a calamitous count travel from the Atlantic to the Mississippi without ever seeing the sun-light. Waste in clearing off the forests—some of it inseparable from the progress of agriculture, some of it unparadoxically stupid and unnecessary—threatened to leave the United States with an inadequate timber supply.

The slow process of reforestation was resorted to in order to forestall that calamity. The raising of lumber on Western cornfields and Southern canebrakes beats reforestation all hollow.—Detroit Free Press.

An Aristocratic Horse

Valued At A Thousand Guineas Is One Of Costliest In World

One of the most beautiful, cleverest and costliest hacks in the world is to be seen in Hyde Park's Rotten Row most mornings just now.

This horse belongs to Wilson Cross, chairman of the American Club in London, and president of an oil company. It is a full-manned, full-tailed bright chestnut, six years old, and valued at a thousand guineas, and Mr. Cross has just brought it from the United States, where it has been winning big prizes in a special class unknown to our people.

It belongs to the type that Americans call a "five-paced horse," which means that in addition to the walk, trot and canter or gallop, it has been trained to two special intermediate paces—a walk and a trot in which the legs move all four in sequence instead of as two pairs.

This special gait is taught by American cowboys to their mounts because for long-distance riding it is as easy as an arm-chair, the rider being able to sit still in his saddle instead of rising to the motion of the horse.—London Sunday Pictorial.

Something To Know

To prevent glass bowl from cracking when hot custard or stewed fruit is poured into it, wring out a large flannel in warm water, fold in two and stand the bowl on this while pouring the hot liquid. Glass jars may be safeguarded when hot jam or preserve is poured into them by the same method. When a number of jars are to be filled a piece cut from a worn blanket is convenient, as it is thick and does not require folding.

Barter Trading Revived

Revival of old time barter trading with the natives of Africa's west coast is in the making. C. Nelson Rogers, president of the West African Trading Company, announced that the old iron bark "Carlovanus," left Boston on November 12, for the Canary Islands and West Coast of Africa, where American goods will be exchanged for domestic products.

WORLD HAPPENINGS BRIEFLY TOLD

Earl Fortescue, a former aide-de-camp to King George, is dead. He was 78 years old. Viscount Errington is heir to the title.

The British admiralty announces that the names of the eight destroyers of the 1931 program will be Echo, Eolipse, Electra, Encounter, Escapade, Escort, Esk and Express.

A piece of quartz picked up casually by a road worker, has started a small gold rush into the Fourth of July canyon, east of Coeur d'Alene, Idaho.

Six new schools to accommodate 8,440 pupils—made necessary chiefly by housing development at Becontree, Essex, England—were opened at Barking, a ceremony believed to be unique.

Rear-Admiral Edward Radcliffe Evans, whose career in the royal navy since 1897 has been marked with a rapid succession of promotions and distinguished services, is promoted vice-admiral.

Great Britain is planning her hope of the world economic conference to be held at London for a solution of the world's problems, said Lord Rending, former Viceroy of India, addressing the British Empire Chamber of Commerce at New York.

Hercules which was responsible for the saving of 37 lives when the steamer "Watford" was wrecked on the coast of Nova Scotia on September 10, was recalled in London recently when Second Officer Herbert Munt was presented with the Lloyd's silver medal for life-saving at Lloyd's of London.

George C. Smith, general traffic manager of the Missouri-Kansas-Texas Railway, believes thousands of Texans are no longer "train-conscious." He said a survey in several leading colleges disclosed 30 per cent. of the students had never ridden a railroad train.

The secret, say delegates to the Illinois Association of Chiropractors, is out: Adam and Eve both had flat feet. "But," said one delegate, "the ancients were better off than the moderns. They suffered from foot trouble due mainly to poor circulation, which they couldn't help."

London's Hospital For Poor

Was Result Of Vow Made By

Pilgrim To Rome
 St. Bartholomew's Hospital in London, England, was built as the result of a vow. Eight hundred years ago a courier named Rahere started on a pilgrimage to Rome. Becoming ill during the journey, he vowed to St. Bartholomew that if he were spared he would build a hospital for the poor. He recovered, and in due course the hospital was built, partly by his own hands. "Bart's," by the way, is the only hospital within the City of London, and the Lord Mayor and Aldermen of the City, while holding office, automatically become governors.

The Bright Side

You can always find some reason for looking on the bright side of things. For instance, was as glad as glad can be that we are not the official office boy who had to announce that Premier Cheng Hsiang-Hsu of Manchukuo was in conference with Foreign Minister Hsieh Chieh-Tshih.

At Colón, canal zone, the average rainfall is about 116 inches a year.

Farmers in Hungary are reported to be in serious financial condition.

Palpitation of the Heart Nerves Bad - Could Not Sleep

Mrs. Fred Bingham, Swift Current, Sask., writes:—"I was bothered with palpitation of the heart, and my nerves were so bad I could not sleep."

I was getting desperate and confided my trouble to a friend who recommended me to use Milburn's Heart and Nerve Pills. I purchased a box and got such relief I would gladly recommend them to all who are troubled as I was."

For sale at all drug and general stores; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Value Of the League

Has Accomplished Much In the Years
Of Its Existence

We have had the League of Nations only a few years now, and in that short time it has done much. It has bound up some wounds of the last war, cured some ills of the present, and prevented some evils for the future. It cannot attempt everything all at once—to give peace in twelve years to a planet which has been distracted by war for more than double that number of centuries. It can only attempt what a sufficient number of its supporters want it to attempt. The real danger in this crisis in its affairs is not of too slow progress but of its falling back through lassitude and ignorance on the part of Governments and peoples into a state where nobody cares whether it lives or dies. That must not be, the world would have no use for an apologetic survival, lingering on like a Holy Roman Empire or a Holy Alliance long after the life had left it.—Manchester Guardian.

Woman Acted As Minister

Took Charge For Month of American
Legation At Stockholm

The United States had a woman acting as its Minister to a foreign capital for the first time. Miss Frances Elizabeth Willis, third secretary, headed the American Legation at Stockholm during a month's absence of Minister John M. Morehead. Military, naval and commercial attaches, as well as a Consul-General and Consul, reported to her. There is no first secretary and the second secretary was absent. Miss Willis sent a cable that satisfied Secretary of State Stimson that she could fill the job—"The Minister left last night; I have assumed charge."—Christian Science Monitor.

White Woman Plans Hazardous Trip

Will Lead Expedition Into Land Of
Head Hunters

The first white woman ever to invade the head hunters of Venezuela will lead a University of Arizona ethnology expedition this winter into the treacherous wilds of the Andes mountains.

Flaunting the traditions of her sex, Mrs. Anna Max McGrath plans to spend several months among three savage tribes. She expects to arrive on mule back in the land of the head hunters by December.

Mrs. McGrath will pierce into the mountain fastnesses of the Guajira Indians, who even today slash the heads of their enemies, and use a method similar to the pygmies of Africa to shrink and mummify the features. Seeking to discover whether the theory is true that the tribe migrated from Florida to South America, she will attempt to find their ancient cities and to trace back through artifacts their history. She will make motion pictures of her explorations.

While in Caracas, Mrs. McGrath will confer with Dr. Raphael Riquena, noted authority on the South American Indians. The expedition will also have as an advisor Andre Manning, renowned Colombian archaeologist.

Nebraska Planning To Heat School
Buildings With Corn

Down in Brazil, recently, they were burning surplus stocks of coffee—just to get rid of it, as they do not need fires in that part of the world, except for cooking purposes. But out in Nebraska artificial heating is necessary during a good part of the year and the school commissioners in one district have decided to heat the court house and 62 school buildings under their jurisdiction with corn next year. They figure it will provide a ready market for the farmers' surplus crop and, perhaps save the country some money at the same time. They estimate they can purchase corn, still on the cob, at \$8 per ton, while coal costs \$12 a ton.—Monoton Times.

Holland is pumping dry a large part of the famous Zuider Zee, so that the area can be used for farm lands.

SUNDAY SCHOOL LESSON

NOVEMBER 13

MAKING A LIVING

Golden Text: "In diligence not slothful."—Romans 12:11.

Lesson: Deuteronomy 24:14; Amos 5:6-15; Mark 6:3; Luke 12:13-21; 19:1-26; 2 Thessalonians 3:6-13; 1 Timothy 6:6-19.

Devotional Reading: Proverbs 30:7-9.

Explanations and Comments

Denunciation Of Injustice and Oppression. Amos 5:11-15.—The prophet Amos is addressing the judges who "trampled upon the poor" by exacting from them a share of their scanty wheat in payment for justice. They shall reap what they have sown, Amos tells them; they shall not live in the houses of leaven stone which they have built, nor drink the wine from the vineyards they have planted. The prophet sees the approaching downfall of the kingdom of Israel.

Recall the observation of Lamarine that man never fastened one end of a chain around the neck of his brother that God did not fasten the other around the neck of the oppressor.

I know how manifold are your transgressions, and how mighty are your sins, Amos exclaims, and then comes the story of accepting bribes from the rich, when they escaped the penalty due, and of withholding their rights from the needy who could not pay a bribe. The "gate" refers to the broad open space before a city gate where claims were adjudged.

"Representative government, democracy, the social order itself, stand in no greater danger than that threatened by the bribe-giver and the bribe-taker. When bribes are passed or deflected for money secretly paid in hand, when justice is sold and law made an article of shameless traffic, the foundations of government and order are undermined."

"Therefore he that is prudent—cautious—shall keep silence in such a time; for it is an evil time. The evil justices were in power, and it was useless for others, so, they thought, to attempt to change things, they would only get themselves into trouble in such a time as has just been described."

"Life is God's sacramental gift To man for his employing—The talent given into his care For his soul's exercising—A sacred trust bestowed on him For his immortalizing And he who lunds will one day ask His own again with interest. See to it, then, lest thou be found Of those who failed Him in the test."—John Oxenham.

How Orientals Do It

Japan Has Built and Delivered Warship To China

For a year undeclared war between China and Japan has been going on, all the time in Manchuria and for two months in Shanghai.

But Japan has just delivered at Shanghai a first-class warship which she has been building for China since May, 1931. Japanese warships are in port and threatening action if the anti-Japanese boycott here does not cease and while a section of the Japanese fleet lies in the river at Shanghai the new Japanese-built Chinese warship steams up-river and is taken over by the "enemy."

The new vessel is a destroyer of 3,400 tons, costing \$2,500,000, has a speed of 35 knots and represents an advanced type of naval craft. She is called the "Ninghai."

Building Fast Car

Sir Malcolm Campbell is building a 1,000-horse-power automobile with which he intends to attempt to better his own world's record of 264 miles per hour. The car will be equipped with a Rolls Royce Schneider cup trophy engine similar to the ones used in setting the world's air speed record and is expected to reach 300 miles an hour.

There is no "L" in the Japanese language and no "R" in the Chinese, so John Chinamen say "All right" and his Japanese enemy says "Aw right."

Smiths Badly Tangled

All Three In Court Case Are Named
William

William Smith had an argument with William Smith and William Smith investigated for the police department.

Smith No. 1, a garage owner in Oakland, California, complained to Smith No. 2, a police inspector, the Smith No. 3, a truck driver, had threatened him when he demanded payment of a bill.

OVER 42 MILLION JARS USED YEARLY

NEW INVENTION DOES AWAY WITH COOKING ODORS

Even fish and cauliflower bow down to Canapar Cookery Parchment

BETTER, CHEAPER AND EASIER

Delicious as cauliflower, cabbage and certain other vegetables are, they have imposed a heavy penalty on people who fearlessly cooked them. Not to mention those who had to suffer the odor without enjoying the finished product. The same thing is equally true of fish.

Canapar Cookery Parchment, a very ingenious invention, does away with this annoyance entirely. While sealing in odors, it also retains flavor and food value. Cooking in Canapar actually parallels the famous French method of simmering and confining food and its flavor in the closed casserole.

You buy Canapar in a large envelope of handy-size sheets which may be rinsed out and used over and over again because they're used odorless. When boiling vegetables you simply wet the Canapar and make a bag similar to a pudding bag. If you steam them in Canapar, you can actually cook three vegetables at once in the same saucepan, this way—save fuel—and the flavors will not intermingle.

Steamed, or boiled, fish comes out firm, solid and swimming in its own juice. No odors. No sticky steamer or saucepan to clean up afterwards.

Line your roasting pan with Canapar, then the fats and juices can't burn. Meat is more succulent and there is no scouring or scraping of the pan afterwards.

Many women use Canapar for a dish cloth—it is so silky and satisfactory, and doesn't spread lint.

You'll never be without Canapar once you start using it. It saves time and money. Made by the makers of the famous PARA-SANI Heavy Waxed Paper in the Great Box.

Special Offer

Most grocers, druggists and department stores sell Canapar, but if yours doesn't, just send the coupon and we'll give you a new and unique book entitled "400 Uses" containing one hundred recipes as a bonus for your trouble.

Applaud Paper Products, Ltd.,
 Enclosed find 25c for which please send me one full-size package of Canapar Cookery Parchment and your 100 recipes for "Leftovers."

ANGLO-CANADIAN TRADE TREATY PASSES HOUSE

Ottawa, Ont.—The House of Commons ratified the Anglo-Canadian Trade Treaty, 128 to 80.

While Conservative cheers resounded through the corridors, the House of Commons placed its stamp of approval on the Anglo-Canadian Trade Treaty, negotiated at the Imperial Economic Conference.

Supported by one Liberal, J. L. Haley, Hants-King, N.S., and six Progressives, Conservative rolled up a majority of 48 as a climax to three weeks of bitter debate.

Maintaining their opposition to the last, Liberals enlisted two Independents and four Laborites in voting against the treaty.

Scores of persons were turned away from the galleries when Premier R. B. Bennett rose to close the debate. He pleaded for a "fair and honest trial" for the agreement, "which will give Canadian producers free entry into the markets of 40,000,000 people."

He accused the Liberals, particularly Rt. Hon. Mackenzie King, of betraying and abandoning the time-honored party policy of fostering empire trade through tariff preferences.

The six Progressives who supported the treaty were: D. M. Kennedy, Peace River; Alfred Speakman, Red Deer; W. T. Lucas, Camrose; M. N. Campbell, Mackenzie; Michael Luchkovich, Vegreville; and A. M. Carmichael, Kindersley.

Monetary Reform

U.F.M. Passes Resolution Urging Stabilization Of Rate Of Exchange

Dauphin, Man.—United Farmers of Manitoba stand as proponents of monetary reform. After lengthy debate delegates in annual convention here passed a resolution urging the Federal Government to stabilize the rate of exchange on the pound sterling.

Resolutions approving a reduction in lake freight rates and encouragement of shipments via the Hudson Bay route also were passed.

The resolution dealing with exchange was termed "hitching the dollar to the pound." A parity of \$4.86 was mentioned as an ideal level. Many papers were read on monetary reform and the history of currency in Canada for the past 25 years was given considerable airing.

Demand for the reduction in lake freight rates follows similar action taken by the United Farmers of Alberta. It is put forward in protest against action of the Lake Shipping Association, which, since its organization in June, the resolution declares, has gradually increased rates from 3½ to seven cents a bushel.

Would Reduce Excise Tax

Cheaper Cigarettes and Liquor If Bill Passes

Ottawa, Ont.—Cheaper cigarettes and liquor may result from a bill introduced in the House of Commons by Hon. E. B. Ryckman, Minister of National Revenue.

The Anglo-Canadian trade treaty reduced tariffs against cigarettes and liquors imported from Great Britain. The Ryckman bill would reduce to the same extent the excise tax paid by Canadian manufacturers, placing them on an equal footing with the distillers and cigarette manufacturers of Great Britain.

The excise tax on Canadian cigarettes would be cut from four cents to \$4, a saving of 60 per cent on a package of 20. The tax on Canadian liquor would be reduced from \$9 to \$7 a proof gallon.

The Anglo-Canadian trade treaty reduced the duty on British cigarettes from \$4.10 to \$3.50 a pound, leaving the tariff against United States and other foreign countries at the higher figure. The duty on liquors was reduced from \$10 to \$8 a proof gallon and again the United States and foreign impost was not touched.

Heavy Wheat Exports

Vancouver, B.C.—Vancouver is not waiting for the effect of British preferences to send its wheat export totals to new high marks. During the past seven days, the weekly report of the Vancouver Merchants' Exchange reveals a total of 2,727,422 bushels was exported. This brings the season's total to 20,921,546 bushels as compared with 10,156,952 bushels at the corresponding date last year.

W. N. U. 1937

Against Public Ownership

C.N.R. Vice-President Does Not Believe in Government Operation Of Railways

Montreal, Que.—The Star prints the following despatch from its Ottawa correspondent:

"Plans put forward by E. W. Beatty, K.C., president of the Canadian Pacific Railway, and Gerard Ruel, K.C., former legal vice-president of the Canadian National Railway, for the solution of Canada's vexed railway situation were rejected by the recent royal commission on transportation in order that the scheme suggested by Sir Henry Thornton, former C.N.R. president, might be adopted in its substantial outline.

"Perhaps as sensational an angle to it as any is the statement of Mr. Ruel, after his years of association with the Canadian National system, that he does not believe in public ownership.

"My experience of public ownership of railways has been that it means government ownership," he told the commissioners.

"You mean political ownership?" Sir Joseph Flavelle asked him.

"Yes," Mr. Ruel returned.

"The plan of President Beatty of the C.P.R. for the solution of the country's transportation difficulties, as revealed by the evidence, was for the government to lease the C.N.R. to the C.P.R. for a long term, or else in perpetuity. Mr. Beatty estimated that the C.P.R. management of the two systems would result in economies totalling \$50,000,000 annually.

"In commenting upon this scheme, C.N.R. witnesses stated the savings would not amount, in their opinion, to more than \$30,000,000 annually.

"Mr. Ruel's proposal was virtually a temporary amalgamation.

Wheat Surplus Increasing

Rome Institute Report Shows 110,000,000 Bushels Carry-Over

Rome, Italy.—Exportable supplies of world wheat are inferior to 1931 by 60,000,000 bushels, the International Institute of Agriculture reports.

This drop is offset by a fall in the probable requirements of importing countries of 170,000,000 bushels. This situation has been caused by poor crops in the exporting countries and good crops in the importing countries, coupled with an abundance of rye, corn and potatoes, the institute report says. Stricter regulations of international wheat trade have also played a part.

The total available for export is fixed at 1,300,000,000 bushels. Of this amount 670,000,000 bushels are old stocks, and 730,000,000 bushels represent the new crop surplus.

Since the old exportable stocks are adequate to meet almost nine-tenths of the needs of importers, practically the entire surplus of the 1932 crop will be carried over for consumption in 1933 and 1934.

It is estimated the existing stocks have increased by 110,000,000 bushels.

May Have Planned Robbery

Youth Arrested In Garden Of Ramsay MacDonald

London, Eng.—What was believed to be an attempt to rob Prime Minister Ramsay MacDonald or his house was revealed in a case in Hampstead police court.

Ivan Serva, described as a British subject, was arraigned on a charge of loitering at the Prime Minister's home. He was accused, police said, in the garden of Mr. MacDonald's house at 3 a.m.

Mr. MacDonald rarely uses his lodge at Fognal, near Hampstead, while parliament is in session, preferring to remain in his official residence at No. 10 Downing Street.

The head of the National cabinet was believed to have been at Fognal Tuesday night, November 1, however, during the disturbance in Whitehall.

Serva is a well-dressed, thick-set youth, who speaks English with a foreign accent. He was carrying bricks under his arms when the police found him.

The prisoner said he had just entered the garden for a look around. He did not resist arrest.

Want Railway To Keep Agreement

Montreal, Que.—The city of Montreal intends to keep the Canadian Pacific Railway to its contract to keep 2,500 men employed at its Angus shops here. What amounted to an ultimatum to the railway was issued by the city following a conference.

In Charge Of Indian Affairs

Ottawa, Ont.—Dr. H. W. McGill of Calgary has taken over his duties here as deputy superintendent of Indian Affairs.

Jobless In Toronto

Mayor Asks Premier Bennett To Care For Transients

Toronto, Ont.—It is the duty of the Dominion Government to care for jobless men who arrived by train from Winnipeg, Mayor W. J. Stewart declared, and wired Premier R. B. Bennett that the government should provide for transportation of the men to their homes.

The number of arrivals was variously estimated as high as 500. Mayor Stewart, in his telegram, reported arrival of 69 on one train and said he was advised another train had arrived with a larger quota. He claimed the homes of some are in the west.

The jobless are said to have come from different parts of western Canada, many of them from the harvest fields in the prairie sections.

New Air Regulations

Operating 'Plane Over Canadian Penitentiaries Is Forbidden

Toronto, Ont.—The Mail and Empire in a despatch from its Ottawa correspondent, quoted J. A. Wilson, controller of civil aviation, as issuing an order forbidding operation of aircraft over Canadian penitentiaries.

The text of the order as carried by the newspaper is: "Pilots and operators of aircraft are hereby warned to avoid flying over or near any penitentiary or like institution. In future any aircraft observed intentionally flying over such institutions for any purpose whatever will be considered to have committed an infringement of the air regulations concerning prohibited areas."

New Wheat Tariff

New Duty Goes Into Effect In Germany

Berlin, Germany.—A new wheat tariff was in effect in Germany Nov. 2, imposing a 7.50 marks duty (about \$1.77) per ton on wheat imported on import certificates.

This tariff will not affect wheat brought into Germany under ordinary tariff schedules, but only that grain previously brought in duty free on certificates issued by the government against wheat exported earlier in the year.

FARMERS ASK FOR LIMIT ON OTTAWA PACT

Dauphin, Man.—Limiting of the imperial conference agreements to the "life of the present parliament" unless a mandate is obtained from the people confirming the five-year term they now contain, is demanded by the United Farmers of Manitoba in a resolution unanimously adopted at the annual convention today. The resolution declares the present policies, "so ruinous to agriculture, be discontinued."

Another resolution bearing on international problems was adopted when, after lengthy debate on currency, a motion was adopted urging the dominion government to stabilize the rate of exchange on the pound sterling at a parity of \$4.86.

Demand for a further reduction in lake freight rates, and the encouragement of shipments via the Hudson Bay route, the dominion government to handle the traffic if necessary during the initial development, also received the support of the convention.

ANGLO-SWEDISH ROYAL ROMANCE REVIVED

With the sudden arrival in London of Princess Ingrid of Sweden, Dame Rumor is again busy predicting that a royal engagement is in the offing with Prince George as the lucky man. Above is a picture of the popular couple. Prince George is the fourth son of His Majesty while Princess Ingrid is a daughter of the Crown Prince of Sweden.

HEADS PENITENTIARY

Lieut-Col. W. B. Megloughlin, M.C. of Ottawa, who has been appointed temporarily warden of Kingston Penitentiary, some of the recent serious riots. Col. Megloughlin served overseas with the 38th Battalion and until he resigned was Commander of the 38th Ottawa Battalion of the Militia. He is forty years of age.

Britain Lifts Embargo On Canadian Livestock

No Need To Exclude Cattle For Fear Of Disease

London, Eng.—The House of Commons moved without division to remove the existing embargo on livestock importation of Canadian cattle to the United Kingdom.

The House decided to lift the embargo after passing the most quoted clause of the Ottawa agreements bill, 203 to 65. Malcolm MacDonald, son of the Prime Minister and under secretary for the Dominions, explained there was no further need to exclude Canadian cattle from the country on the ground it might be diseased.

He said also the period of detention of cattle at the Canadian port of shipment would be one day instead of the customary three days as the length of the voyage was sufficient to allow time for development of disease should it occur.

Lifting of the embargo will go into effect when the Ottawa agreements bill becomes law. The bill is expected to encounter little opposition in the House of Lords.

To Care For Jobless

Alberta Relief Commission To Take Charge Until Relief Camps Open

Calgary, Alberta.—Calgary city fathers bid farewell to a great burden when the Alberta government decided it would take full responsibility for single jobless who have crowded into the city to the number of more than 2,500. Alberta relief commission will handle the feeding and housing of the men who will obtain two meals a day and bed tickets until relief camps are opened.

Following conversations with city officials the relief commission chairman, A. A. MacKenzie, and Mayor Andy Davidson announced the agreement whereby the provincial authorities would handle the situation. A community kitchen will be opened here, and the men will be given meals after they have registered with relief officials.

How long the arrangement will continue is unknown as it depends on when the relief camps are opened. However, it was emphasized men refusing to go to the camps when they are formed would be refused any relief.

Has Little Information

Machray Unable To Shed Much Light On Shortage Of College Funds

Stony Mountain Penitentiary, Stony Mountain, Man.—Clustered about an impromptu sick bed in a little room in the administration building of the prison, a board of inquiry and staff learned from John A. Machray, who knew little of the financial collapse that sent him to penitentiary for seven years.

Obviously suffering severely, the former lawyer, university bursar, churchman and financier lay propped by pillows on a couch and emphatically declared he nor anyone else to his knowledge, ever profited from the financial debacle that wiped out endowment funds of the University of Manitoba and the Church of England, and swept his own investment firm into bankruptcy.

At times writhing in pain and tossing his head with half closed eyes, Machray lifted a shaking white hand to emphasize his declaration. He had no memory of any happenings in his office, he said, and asked the commission, investigating \$1,000,000 defalcations in college funds, to allow him to continue his plans for providing information.

Interested In Grain Show

Eastern Provinces Preparing To Compete In All Classes

Regina, Sask.—John A. Mooney, managing director of the World's Grain Exhibition and Conference, has returned to the city after an extended visit to eastern Canada in the interests of next year's world-wide cereal exhibition.

He stated that all the eastern provinces are making elaborate preparations to be represented at the exhibition, not only in the competitive classes, but also in the section reserved for provincial educational exhibits.

Interest in the forthcoming exhibition is very widespread in the east, Mr. Mooney stated, and farmers are working in close co-operation with provincial departments of agriculture to ensure the best possible grain samples for entry in the competitive classes.

The Exchange Question

Federal Government Is Deeply Concerned About The Matter

Ottawa, Ont.—The Canadian Government is very deeply concerned about the exchange question, Hon. H. H. Stevens, Minister of Trade and Commerce, told the House of Commons. His remarks followed an amendment by G. G. Coote, (U.P.A., MacLeod), who had asked that the ratification of the imperial conference agreement be coupled with an undertaking to bring the Canadian dollar to a parity with the pound sterling.

HOUSE REFUSES TO DISCUSS SUN LIFE CHARGES

Ottawa, Ont.—Efforts to discuss the finances and management record of the Sun Life Assurance Company of Canada proved abortive in the House of Commons.

Amid a series of interruptions and general disorder, the Speaker ruled the subject was not sufficiently important to sidetrack debate on the Anglo-Canadian trade treaty. And the House upheld him 128 to 55.

Mitchell F. Hepburn, Liberal, West Elgin, sponsored the move "to investigate the present financial position of the Sun Life Assurance Company of Canada and the conduct of its senior officials as disclosed in Chicago by the recent court investigation into the affairs of Emanuel and Martin Insull, now indicted by the United States government on charges of embezzlement and larceny."

A hush fell over the chamber as the leader of the Ontario Liberal party handed the Speaker a three-page typewritten statement containing his charges against the officers of the insurance company. For a minute or two the Speaker studied it, then ruled the discussion out of order.

"Read the statement," shouted members of the Progressive group. "Let's know all about it," came from others. But the Speaker steadfastly refused to read the statement or permit any discussion.

Z. S. Woodsworth, Winnipeg Laborite, jumped to his feet, flourishing a copy of the Hepburn statement. He challenged the Speaker's ruling, saying that in his years in the House he had seen nothing "quite so arbitrary."

BALDWIN HAS A PLAN TO ASSIST IDLE OF BRITAIN

London, Eng.—Stanley Baldwin, Lord President of the Council in the National Government, informed the United Club that the government is working on a programme to deal with the entire problem presented by the able-bodied unemployed of the nation.

"We hope to get it into law by the summer of next year," Mr. Baldwin said. "Our plans are not ready for that yet, but I think it may be possible for something to be contained in the king's speech for the opening of parliament."

"We hope to effect a really adjustable and just scheme which will be capable of standing the test of the next half century."

The "hunger marchers," who moved into town a week ago to serve a set of demands on the government had ceased to be a threat, but remained as a problem.

A few of them have already gone abroad where they came from, but apparently the weary march in has deterred the rest from beginning the march back. They seemed to have decided they might as well be here as at home, and most of them stay on, sleeping in the places provided for them by city authorities.

British House Passes Pact

Ottawa Agreement Is Given Substantial Majority

London, Eng.—To the accompaniment of loud ministerial cheers the House of Commons gave third reading to the government's Ottawa agreements bill with a heavy majority of 348. The vote was 416 to 68.

The bill was then sent to the House of Lords.

Final hours of debate brought a renewed attack on the trade pacts between the United Kingdom and the Dominions, concluded at the Ottawa Economic Conference, by Sir Herbert Samuel, leader of the free trade element in the opposition.

Sir Herbert declared Neville Chamberlain, Chancellor of the Exchequer, himself, had been forced to contemplate the possibility of a changed government, in some one of the Dominions repudiating its agreement with the United Kingdom.

It had been made clear during the course of debate, he continued, that the agreements which purported to be for five years could be altered at any time by parliament whenever it chose.

He maintained that apple growers in Canada who thought they had an absolute agreement for five years now found they had not.

Mr. Chamberlain replied for the government that new Canadian duties, substituted by the Anglo-Canadian pact for existing duties, could not be altered within the next five years except to a limited degree specified in the agreement.

New Amendment

Ottawa, Ont.—A new amendment to the motion for ratification of the Canada-United Kingdom trade treaty was moved by Dr. Thomas Donnelly (Lib., Willow Bunch), in the House of Commons. It declared that no approval by the Canadian parliament be held to preclude the entering of this country into any arrangement which may be proposed at the coming world economic conference.

Railmen Confident

Montreal, Que.—Confident that "the government will find some method of being helpful to those men affected by shut-downs in railway shops from coast to coast," Frank McKeown, chairman of the Federated Trades of the Canadian Pacific Railway, returned to Montreal from Ottawa after securing an interview with Premier R. B. Bennett.

No Session Till January

Saskatoon, Sask.—Rumors of the possibility of the Saskatchewan legislative meeting early in December were scotched when Premier J. T. M. Anderson stated it was extremely unlikely there would be a session until early in January. The premier made the statement on his arrival here last week.

Hunger Marchers Go Home

London, Eng.—Balked in their third attempt to enforce their demands, the unemployed "hunger marchers," who straggled into London, turned homeward. Thirty men climbed aboard a charabanc and started back for Brighton, whence they came. Other contingents also prepared to go home.

Ice In North Receding

Geologists Say It Might All Melt In Time

Scientists seem determined to make our flesh creep, and if they have not succeeded in doing so it is certainly not from lack of—dare one say?—imagination. We are constantly being told about the unpleasant things that would happen if such and such an occurrence took place in nature and in this or that miscalculation arose in the workings of the solar system. One of the latest recruits is Dr. W. J. Humphreys, of the United States Weather Bureau, who declares that if all the ice in Greenland and Antarctic were to melt the water formed would raise the level of the ocean 150 feet—that is, more than sufficient to inundate a large portion of the world and all of its possessions.

"Pooh!" says the phlegmatic public, "but the ice won't melt." "Don't be too certain of that," interrupts a chorus of geologists, "for the ice of the Frozen North is steadily receding." At certain periods, state the geologists, Greenland did not have much ice, and these times may come again. About 1000 A.D. the Danes settled in parts of Greenland that later became icebound and then melted again. The ice has been retreating for a long time now. From the 12,000,000 square miles in existence at the period of last maximum glaciation there now remains only 6,000,000 square miles, mostly in Antarctic. Other cheerful geologists have recently pointed out that a drop of only three degrees in the average temperature of the temperate zone would bring back the glacial period and push the inhabitants of Britain, North America, and elsewhere down nearer the Equator.

Simply Not Done

Nothing In Stories About Toads Living Years Without Air

The toad which is said to have lived for 33 years inside a cannon ball at Franklin, Penn., turned out to be a mere infant, an amateur in longevity. At Woodstock, Ont., while excavating for a sewer, a three-legged frog was found, so they say, imprisoned in hard clay five feet underground, and the theory was evolved that it had been down there fifty to sixty years—lying, so it was said, "on the tiny fibres sprouting from the roots of an old tree."

This was not bad, but not good enough to hold the record very long. A professor, an archaeologist at that, at Wellesley, Mass., made the solemn statement that in Corinth, Greece, when he was excavating in the ruins of a theatre, he released two toads incarcerated 1,900 years ago. They blinked a bit, and then went on about their affairs.

These reports and a hundred like them which could be picked from the news of the season, indicate of course, nothing more than the enormous capacity for self-deception possessed by the average individual, even—digger or professor. As the St. Catharines Standard puts it, "any toad which hops around an old building which is being demolished, or a cement wall which is being smashed up is generally credited with having done the impossible, lived for years without air. And it is simply not done, not even by toads."—Ottawa Journal.

No School In Winter

Children In Colorado Mountains Kept Home By Snow

While school children all over the country returned to their studies after a summer's vacation, Hamilton's eleven pupils looked forward to the beginning of their annual vacation.

Hamilton, high up in the Greenhorn mountains in Colorado, is covered with deep snow during the winter months, making school attendance impossible. Instead of the usual summer vacation the children are given a vacation during the winter months.

Fool-Proof Fire Alarm

A "false alarm proof" fire alarm box was one of the new devices on display at the convention of the International Association of Municipal Electricians at St. Louis. The new invention, tests showed, handcuffs the person holding him until firemen, who carry the key to the handcuffs, arrive on the scene.

Of 4,300 varieties of flowers tested for scent in Europe only 420 had an agreeable odor.

"I want to do something big and something clean."
"Then wash an elephant."

W. N. U. 1987

Apostle Of Cheerfulness

Famous British Surgeon Believed It To Be A Duty

An apostle of cheerfulness, Sir Charter James Symonds, pioneer of abdominal surgery in London, who died recently, aged 80, held that "cheerfulness is a duty. It is essential to fitness of mind, and the goblins of life hate the singing of a cheerful heart. I make a practice of smiling at everybody and the result is that everybody smiles at me."

Other suggestions of the famous surgeon were:

"Learn a sonnet of Shakespeare's while you are shaving in the morning. This practice will help keep you mentally fit."

"If you have a bundle of thorns in your lot, there is no necessity to sit on them."

"Don't look too closely for faults either in yourselves or other people, but look for what is good and strong and beautiful, and the faults will drop off like leaves."

Since 1912 Sir Charter has been consulting surgeon to Guy's Hospital, London, England, which he had served for fifty years. For some years he was consulting surgeon to His Majesty's forces. During the World War he was successively consulting surgeon to the Eastern Command, at Saloniki, to the Netley Hospitals and to the Southern Command.

An ancestor, William Symonds, left London in 1635 and settled in Woburn, Mass. Descendants of William Symonds later moved to Danvers, N.H., where Sir Charter was born. He was one of the first surgeons to remove an appendix.

Strange Tales From Lost Property Office

People Leave Peculiar Things On Trains In England

It is amazing the things people lose at times. If you visit the Lost Property Office in London, England, they will tell you strange tales of mislaid property. Cofins, pianos, motor-cars, and typewriters are amongst the things people leave behind them and then forget.

One can understand people losing collar studs or pins, but what about milk churns? Last year more than 3,000 were mislaid by farmers and dairy companies. Every week the companies which supply London with milk have an average loss of about 100,000 bottles. So serious are these losses that the dairies have established a regular sleuth service which tracks them down by the thousand, usually in the most unexpected places.

The world's record loss occurred in India a few years ago. A goods train disappeared in the north and was not found for several months, when it turned up many hundreds of miles away in the south.—London Tit-Bits.

Building Dam Across Nile

British engineering firms soon will submit tenders for a \$50,000,000 dam across the Nile. It is proposed to divert the main flow of the Nile, to raise by 10 feet the level of the vast Lake Albert, and to drain millions of square miles of marsh land, now an inhospitable hotbed of disease.

Auto bandits are active in Scotland.

Unimpressed Friend (to Jones, exhibiting with pride his horticultural achievement): "Got nipped in the bud, I suppose!"—London Opinion.

Intriguing Office Devices

Many Unique Devices Exhibited At New York Show

Among the attractions exhibited at the National Business Show in New York are:

Typewriter ribbon boxes, which after use, can be converted into vanity cases;

A new demaprint photographic stencil which translates the principle of photo engraving to the mimeograph;

A duplicating machine which turns out copies in four colors;

A varityper which writes in approximately 50 languages and nearly 400 different type styles;

Machinery used in connection with psychological tests for personnel.

This last group of intriguing devices makes it possible to conduct a test, involving 420 items, in less than ten minutes. Such tests formerly required almost a full day.

Memories Of Childhood

One Person Recalls Incident When Eighteen Months Old

A London paper has been asking its readers to recall their very earliest memories. The earliest recollection was of an occurrence when the narrator was eighteen months old. This is the story: "I can distinctly remember my father carrying me at the age of eighteen months to a confectioner's, where I tasted marshmallows. I can also remember about the same time my mother reproving my brother and me very severely for being so rude as to say 'Shut up.' Another memory is even more clear. About three months before my second birthday I fell and gashed my chin on a tin can. I can still see the fur rug on which I tripped rising up to meet me as I fell."

Florida plants its lilies for the Easter trade in late September.

Keeping Up Sales

Wise Merchant Knows Aggressive Advertising Is Best Way

How is business? Such a question is apt to rub the average merchant the wrong way these days. Yet we do hear of firms that have actually increased their business in 1932. A well-known concern which makes a popular line of breakfast food is, we understand, doing a much bigger business today than it did two and three years ago. A great soap firm that is following a very aggressive policy in its advertising this year, is also showing a substantial increase in sales.

Both of these firms have increased their advertising appropriations since the depression began. Their advertising is very strikingly prepared and it is all the more outstanding owing to the firm's competitors having pulled in their horns. After all, the average merchant's overhead expenses have been reduced very little with the depression, it is his sales that have lagged, pulling down the profits of the business with them. To keep up the volume of sales as high as possible is the big consideration. And the merchant, who gives the matter any thought, will realize that live, aggressive advertising will help him to do this. To keep his advertising working strong for him is even more important now than it was in the flush times before 1929.

Auctioning Off Relics

Old Turkish families are auctioning off relics of their shattered wealth so fast that the Istanbul municipal auctioneer alone put 30,000 objects under the hammer this year. More than 9,000 rugs and 10,000 pieces of jewelry, including many diamonds, brilliants, emeralds and rubies were auctioned.

Natural gas was first used as illuminant at Fredonia, N.Y., in 1824.

Oldest Known Mascot

Share Of Son's Favor
The Swastika is credited with being the oldest as well as the most powerful mascot in existence. The sign has been found on ancient rock carvings in India, China, Japan and elsewhere, and on stone implements belonging to the very earliest races of mankind. The belief that it attracted good fortune arose from the fact that it was used by the ancients as the emblem of the sun. All the ancient races worshipped the sun, and the emblem was supposed to attract to the person who wore it, a big share of the sun's favor. The name Swastika is Sanskrit, and means "happiness."

Natural gas was first used as illuminant at Fredonia, N.Y., in 1824.

"Sheak Net" Still Used

Every Ship In Port Places Safety Device Under Gangway

"Better hang out the sheak net," was the phrase in a nautical book that caught our fancy the other day, and with the journalistic thirst for information about new things they hunted up some information about its meaning. It is a common expression of railway among deep-sea sailors, and it seems to have its origin thus:

In the days of the windjammers, in the 'seventies, there was a very potent drink to be had at Sandridge and Williamstown, in Melbourne, called "sheak beer." This was said to be made from the bark of the sheak (tree). One or two glasses would knock "Poor Jack" over, with the result that a large number of drunken men were drowned when going aboard their ships late at night. To minimize this an Act was passed making every ship hang a net under her gangway before anyone was allowed aboard or ashore. This Act is still in force at all ports; even the large passenger ships have to place it under their gangways. This net has always been called a "sheak net."

Many years ago the piermaster at Sandridge, now Port Melbourne, had a fine Newfoundland dog which followed every drunken sailor down the pier to his ship. If they managed to get safely aboard the dog returned; if the man fell into the sheak net he would howl till the man was rescued. The dog never followed a sober sailor.—St. Thomas Times-Journal.

Egg Apply Term

"Bottled Sunshine"

It Is Rich In Proteins, Vitamins, and Minerals

An egg is 66 per cent. water, 13 per cent. protein, 10 per cent. fat and 11 per cent. lime or ash.

In an egg 60 per cent. is white, 30 per cent. yolk, and 10 per cent. shell. The egg is aptly termed "bottled sunshine." It is rich in proteins, vitamins and minerals.

The best eggs of the year are those laid in the months of April, May and June.

Two tons of grain will produce 480 dozens of eggs if fed to normal layers with sufficient water, lime and green stuff.

An egg eaten between September and March is worth more to the average person in a northern climate than one eaten between April and August.

Eggs and milk together are liquid meat in the most digestive and assimilable form.

An egg weighing two ounces holds approximately 70 calories in fuel value.

Of the five vitamins the egg supplies Vitamin A, B, D and E. It is particularly rich in "D," the sunshine vitamin.

Oldest Known Mascot

Ancients Believed Swastika Attracted Share Of Son's Favor

The Swastika is credited with being the oldest as well as the most powerful mascot in existence. The sign has been found on ancient rock carvings in India, China, Japan and elsewhere, and on stone implements belonging to the very earliest races of mankind. The belief that it attracted good fortune arose from the fact that it was used by the ancients as the emblem of the sun. All the ancient races worshipped the sun, and the emblem was supposed to attract to the person who wore it, a big share of the sun's favor. The name Swastika is Sanskrit, and means "happiness."

Alfalfa Crop

British Columbia Shows Highest Yield Per Acre

British Columbia stands first of the provinces in the yield per acre of alfalfa. The estimated crop this year is 3.29 tons per acre; Ontario 2.95; Quebec 2.80; Saskatchewan 2.58; Alberta 2.45; Manitoba 2.07. The Dominion Bureau of Statistics has no reports of alfalfa in the maritime provinces. In estimated quantity production Ontario leads with 1,542,000 tons; Alberta 1,460,000; British Columbia 1,350,000; Manitoba 34,000; Quebec 28,000; Saskatchewan 24,000. The total estimated production of 1,609,000 tons is 521,000 more than last year.

Got What She Wanted

Sea thrills were sought by Miss Nettie Urquhart, of Glasgow, Scotland, during her recent three-week vacation. First she explored the bottom of Boddan Harbor in a diving suit, then took two six-day trips to the northern fishing grounds on board an Aberdeen trawler. Next she sought adventures on a drifter to the herring fishing grounds near Peterhead.

Hopeful Side Of Cancer

Largely A Preventable Disease In People Correctly Informed

The hopeful side of cancer was never known fifty years ago, because then the people and the medical profession were ignorant; the people, uninformed of the importance of being examined the moment they were warned, and the medical profession, still ignorant of the proper treatment, even in cases of operable and curable cancer.

The first uniformly successful cures of cancer were due to the rapid development of modern surgery, and practically all the operations which are successful in the cure of cancer today were conceived and executed successfully before 1900. They should be associated with the names of Billroth of Vienna, Halsted of Johns Hopkins, and Kraske and Wertheim of Germany. Then came the discovery of the X-rays and radium, which have been successfully employed chiefly in the past fifteen years.

By 1900 many members of the medical profession throughout the world knew, from their records, that the majority of cases of cancer cured by surgery were in the very early stage. To increase the number of individuals who see the signs of the medical profession in the very early stages depended upon getting a message to them containing the correct information about the earliest signs and symptoms of local conditions which could be easily seen or felt, which might be the local condition preceding cancer or the early stage of cancer itself. By 1913 we had found out that the only way to get the individual to the earliest signs from cancer to the people was through the press.

Our studies from 1913 to 1930 demonstrate that individuals correctly informed in regard to cancer run a risk of cancer in seventeen per cent. instead of eighty per cent. which is the risk of the ignorant and uninformed. The chances of a cure of cancer in the enlightened group is more than sixty in the ignorant group it is less than ten per cent.

Briefly, what is it that every one should know for protection against cancer? First, cancer never begins as cancer, but always as a local change or spot which is not cancer. When the individual sees the first warning at this time, he is always protected from cancer. In the external cancer the warning is definite, and when the spot is in the skin or the lining of the mouth, the person will know it before it is cancer. When it is a small lump beneath the skin, the lump may so deeply buried that it is not felt until its cells have become cancer cells. Therefore, if any one notices a spot on the skin or the lining of the mouth and seeks examination and treatment at once, no one should die of cancer of the skin or mouth. When one has a lump anywhere, the first thing to do is to have it examined by a competent physician, and if it is not cancer, no treatment, irradiation, or removal.

When the cancer is internal, the warnings are different. It may be an unusual discharge from one of the inlets or outlets of the body, irrespective of the character of the discharge. The warning may be pain or an unusual feeling of any kind, or a change in the normal functions of the body.

The difficulty is not that the individual does not know of the very first symptoms, but that he does not know that these first and insignificant symptoms are the first warning of a dangerous condition, and for that reason an examination should be sought at once.

The two most important statements which should reach every individual in this country today are:

Select a family physician for yourself and your family before illness comes, not after. See the family physician once a year, no matter how well you feel. Second, every woman who has borne children should go to the physician who took care of her at that time, for pelvic examination, or, if this physician is not available, select an equally good, or a better one, for this periodic examination which is the greatest protection against cancer of the cervix.

The German Peril

Britain Must Maintain Friendship To Avoid Trouble

Germany is the most dangerous element in Europe. In international affairs she will go budgeoning through as she has always done. In spite of her unfortunate manner, she must not be given the sense of isolation, especially by Great Britain. She must be cultivated assiduously, and friendship maintained. Let us, however, not forget or ignore the facts in our negligent English way. Our own opinion is that unless the Great Powers adopt a policy of real disarmament within the next 12 months thrusting aside all legal quibbles, the relation of Germany with other countries will grow rapidly worse and we shall head towards another World War.—Everyman.

As He Found It

Mrs. Youngbridge—Bob, dear, what is the difference between "abstract" and "concrete"?
Husband—Well—er—let me see. It's like this: When you promise to make a cake, that's abstract—when you actually make one it's concrete.

While contingents of hunger marchers from all the rural districts of England were invading London at many points under the watchful eye of 40,000 "Bobbies" and civilian volunteers, members of the British Cabinet, Laborites and Liberals were busy in the historic House of Commons blaming each other for conditions that have made such a spectacle possible. Sir John Gilmour, Home Secretary, laid the blame for the entire affair on the shoulders of Communist propagandists, but was flatly contradicted by George Lansbury, Labor Leader, who accused the government of Premier MacDonald of being the direct cause of the present acute unemployed situation. The main picture above shows London policemen meeting the advance guard of the hunger marchers.

"Did you say CRISP? Just try one"

Such crispness, flakiness, freshness are found only in Christie's Premium Soda Crackers. They furnish just the salty tang for soup or salad... just the crisp base for cheese or jam.

Christie's PREMIUM SODA CRACKERS

THE HOUSE OF DREAMS-COME-TRUE

— BY — MARGARET PEDLES

Author of "The Splendid Polly," "The Herald of Foghorn & Bloughston, Ltd., London.

CHAPTER XXXVII.—Continued.

With a little inarticulate cry she ran to him—to the place that was hers, now and for all time, against his heart—and his arms, that had been so long empty, held her as though he would never let her go.

"Beloved of my heart!" he murmured. "Oh, my sweet—my sweet!" They spoke but little. Only those foolish, tender words that seem so meaningless to those who are not lovers but which are pearls strung on a thread of gold to those who love—a rosary of memory which will be theirs to keep and tell again when the beloved voice that uttered them shall sound no more.

CHAPTER XXXVII.

"An House Not Made With Hands"

The landlord of the Inn of the Green Dragon watched his two English visitors ride away up the steep road that led to Beirnefels with unquestionable regret.

They had been lodging at the Green Dragon for the past fortnight, and he had discovered that English millers, whatever else they might be, were

not niggardly with their money. They required a good deal of attention, it is true, and had a strange, outlandish predilection for innumerable baths, demanding a quite unheard-of quantity of water for the same. And at all unlikely hours of the day, too—when returning from a ride or before going up to the castle to dine, mark you!

Still, they made no difficulty about paying—and paying handsomely—for all they wanted, and if a man chooses to spend his money upon the superfluous scrubbing of his epidermis, it is, after all, his own affair!

And now the two English millers were taking their departure from the Green Dragon, and, so the landlord understood, proposed to stay at the castle itself until their return to England.

It appeared that their lady-mother—who, it was rumoured in the village, was the daughter of an English archduke—no less!—was coming to Beirnefels and there was much talk amongst the village girls of weddings and the like. Apparently the Green Dragon's two eccentric visitors, notwithstanding their altogether abnormal liking for soap and water, were much as most men in other respects and had lost their hearts to the two pretty English ladies living at the castle. So, no doubt, the "daughter of an English archduke, no less," was coming from England post haste to enquire into the suitability of the brides-elect—and also into the important point of the amount of the dowry each

might be expected to bring her future husband.

There was no question that Lady Anne was certainly coming post haste—in reply to a series of joyful and imperative telegrams demanding that she should pack up and come to Beirnefels immediately—"for we are all enjoying ourselves far too much to return to England at present," as Nick wired her with an iniquitous disregard for the cost per word of foreign telegrams. And Lady Anne, who always considered money well-spent if it purchased happiness, proceeded to wire back with equal extravagance that she was delighted to hear it and that she and her maid would start at once.

It was a very happy party that gathered round the table in the great dining-hall at Beirnefels on the night of Lady Anne's arrival, and beneath all the surface laughter and gaiety lay the deep, quiet, thanksgiving that only comes to those who have emerged out of the night of darkness and sorrow into a glorious sunlight of happiness and hope.

After dinner, in the soft, candle-lit dusk—for Peterson had never introduced the garish anomaly of electric light into the ancient castle—Jean sang to them in that quaintly appealing, husky voice of hers, simple tender folk-songs of the countryside, and finally, at a murmured request from Blaise, she gave them "The House of Dreams."

It's a strange road leads to the House of Dreams, To the House of Dreams-Come-True, Its hills are steep and its valleys deep, And salt with tears the Wayfarers weep, The Wayfarers—I and you.

But there's sure a way to the House of Dreams, To the House of Dreams-Come-True, We shall find it yet, ere the sun has set, If we face straight on, come fine, come wet, The Wayfarers—I and you.

As the last words died away in silence, she looked up and met Blaise's eyes. He was leaning against the piano, looking down at her with a tranquil happiness in his gaze.

"Our House of Dreams-Come-True, Jean, at last," he said softly. She met his glance with one of utter trust.

"And we needn't ever fear, now, that it will tumble down. But oh! Blaise, if we had built on a rotten foundation, we should never have felt safe—not safe like this!"

"No. You were right, beloved—as you always have been, always will be." Then, very low, so that none but she should hear: "Thank God for you, my sweet!"

It was ultimately settled that the whole party should remain at Beirnefels until the latter end of June, when they would all return to England together and the two weddings should take place as soon as possible afterwards.

"But we won't have a double wedding," declared Jean. "It's always supposed to be unlucky."

"Do you believe in good and bad luck, then?" asked Lady Anne, smiling.

"I don't know," Jean answered seriously. "But it's always just as well to be on the safe side. Anyway, we won't tempt Fate by running unnecessary risks!"

"Besides, madonna," added Nick, "in the excitement of the moment we might get mixed and the parson hitch us up to the wrong people. The average nerve-strain attendant upon the role of bridegroom will be quite sufficient for me, thank you, without the added uncertainty as to whether I'm getting tied up to the right woman or not."

So spring lengthened out into summer, and, as the heat increased, boating and swimming on the big lake that nestled in a basin of the hills were added to the long rides and excursions with which they willed away the pleasant, sunny days.

Ever afterwards, the memory of those tranquil months at Beirnefels would linger in the minds of those who shared them as something rare and precious. It was as though for this little span of time, passed so far away from the noise and bustle of the big world, they had pulled their barges out of the busy fairway of the river and moored it in some quiet, shady backwater. Then, when they were rested and refreshed, they would be ready to face again, with fresh strength and courage, the difficulties and dangers of mid-stream.

"I'm sorry it's so nearly over—this long, long holiday of ours," said Jean regretfully. "The only thing that reconciles me to the fact is that after we've married Blaise and I propose to spend at least six months out of every year at Beirnefels."

Stop and Think!
it pays to **"ROLL YOUR OWN"** with

It pays in pleasure—and pays in actual cash.

For Turret Fine Cut is fragrant, mellow Virginia tobacco, that rolls into thoroughly satisfying cigarettes. You can roll at least 50 cigarettes with a 20c package.

FREE Chantecler cigarette papers with every package.

15c and 20c packages—also in 1/2 lb. vacuum tins

TURRET FINE CUT Cigarette Tobacco

These Pies Are New

Very Easily Digested Because Simple Ingredients Are Used

Since the principal ingredients of these pies are sweetened condensed milk, Graham crackers and lemon juice they are very easily digested.

PEACH CREAM PIE*

- 1 1/2 cups (1 can) Eagle Brand Sweetened Condensed Milk.
- 1/2 cup lemon juice.
- 1 cup sliced peaches.
- 1/2 cup whipping cream.
- 2 tablespoons confectioners' (4x) sugar.

Chocolate Wafer Pie Crust. Blend those Eagle Brand Sweetened Condensed Milk and lemon juice. Fold in sliced peaches. Pour into a nine-inch pie plate lined with Chocolate Wafer Crust. Cover with whipped cream sweetened with confectioners' sugar. Chill before serving.

CHOCOLATE WAFER PIE CRUST

Roll enough chocolate wafers to make 1/2 cup of crumbs. Cut enough chocolate wafers into halves to stand around the edge of pie plate. Cover bottom of plate with crumbs and fill in cavities between wafers. Four in filling as usual.

*It is possible to use apricots in place of peaches in the above recipes.

Paris Overcomes Noise

Has Become One Of Most Silent Cities At Night

One of the noisiest cities in the world by day, Paris has become by night one of the most silent, owing to the relentless war against "bruits nocturnes" waged by the police. When a decree proscribing various unnecessary noises was announced it aroused general derision. Yet, in spite of the great activity in Paris at night, the degree of silence achieved is a tribute to the success of the police. A list of the proceedings taken during a period of eight weeks shows that almost every possible kind of offense has been committed detected and punished. Of the 889 cases in which action was taken the majority were against motorists for use of the horn during prohibited hours.

Douglas' Egyptian Liniment should be in every household. Stops bleeding at once, cauterizes wounds and prevents infection. Keeps away inflammation and pruritus.

THE RHYMING OPTIMIST
By Aline Michaele

GODS

Oh, the god that one man worships Is a thing of wood and jade, With topaz eyes and ivory hands And feet, grotesquely made!

And the God another kneels to Walks, unseen, where candles bloom And the incense slowly rises Through a lofty, vaulted room.

But the God who gives me courage For the conflict, day by day, Is the God who keeps beside me Wherever I may stray.

Oh, my God is farther distant Than the idol, strangely dressed, Yet my God is nearer to me Than the heart within my breast!

For I find Him in the heavens And in every starry land, And I find Him in the rosebud That is lying in my hand!

For Roads Commission

Recommend Federal Body To Work In Harmony With Provincial Highway Commission

A federal commission to work in harmony with proposed provincial highway commissions was recommended at the concluding session of the western division, Canadian Automobile Association convention, Calgary, when officers were elected and a heavy business agenda completed. A. B. Mackay, Calgary, was re-elected president and A. C. Emmett, Winnipeg, was again named secretary. Both officials have held the same offices since the western division organized four years ago.

Little Helps For This Week

"For this is the message that we heard from the beginning, that we should love one another."—1 John 3:2. Be useful where thou livest, that they may

Both want and wish thy pleasing presence still. Find out men's wants and will, And meet them there. All worldly joys are less To the one joy of doing kindness.

Small kindnesses, small courtesies, small considerations habitually practised in our social intercourse, give a greater charm to the character than the display of great talents and accomplishments.—M. A. Kelly.

Let the weakest, let the humblest remember that in his daily course he can, if he will, shed around him almost a heaven. Are not kindly words almost the staple of our daily happiness? From hour to hour, from moment to moment, we are supported, blessed, by small kindnesses.—F. W. Robertson.

Asthma No Longer Dreaded. The dread of renewed attacks from asthma has no hold upon those who have learned to rely upon Dr. J. D. Kellogg's Asthma Remedy. So safe do they feel that complete reliance is placed on this true specific with the certainty that it will always do all that its makers claim. If you have not yet learned how safe you are with this preparation at hand get it today and know for yourself.

Bigger Face But Shorter Hands London's largest clock, installed in a new commercial building, has a face two and a half feet larger than that of Big Ben, but its hands are shorter than those of the older clock.

You may be a fine, upstanding citizen, but that doesn't make any difference to a banana skin.

Try COFFEE... this Way!

ONCE YOU start having Boston's St. Charles Milk in your coffee, you will never again be without it in the house. It blends in smoothly, turning the coffee to a rich golden brown, and has a rich, luscious taste that makes one come back for more.

Boston's ST. CHARLES MILK
UNSWEETENED (VAPORIZED)

TOO MUCH ACID

The right anti-acid offsets the harm otherwise done by excessive eating, drinking, and constant smoking, anything causing an acid condition. When "sunk" from such indulgences, Phillips' Milk of Magnesia will always straighten you out. A joy and comfort to hearty eaters, constant smokers. Get the genuine; substitutes don't act the same.

ALSO IN TABLET FORM, Phillips' Milk of Magnesia Tablets are now on sale at drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

Made In Canada

THE CHINOOK ADVANCE

Published by Mrs. M. Nicholson every Thursday afternoon from The Advance Building, Main Street, Chinook, Alberta, and entered in the postoffice as second class mail matter.

All letters addressed to the editor for insertion in The Advance, must be signed to show bona fides of the writer. Publication in all cases is subject to the judgment of the Publisher. We do not necessarily coincide with views expressed.

The subscription rates to The Advance are \$1.50 per annum in Canada and \$2.00 outside of Canada.

The transient advertising rates in The Advance are—display, 40c per inch for first week and 30c for each succeeding week, providing no change is made. For heavy composition an extra charge is made for first week. Reading notices, 10c per count line. Legal advertising, 15c per count line for first week and 10c for each succeeding week. Cards of thanks, \$1.00.

The Advance is a member of the Canadian Weekly Newspapers Association and the Alberta Weekly Newspapers Association, and observes the prices and conditions of these organizations.

Small Advertisements

Advertisements under this heading are charged at the rate of 50c for 25 words or less per week, with 10c for each additional 5 words. Three weeks for the price of two.

German Election Results

In the German election held last Sunday results were as follows:

National Socialists now 195, were 230. Socialists 121, were 133. Communists 100, were 89. Centrists 70, were 75. Nationalists 51, were 37. Bavarians 18, were 22. Populists 11, were 7. Christian Socialists 5, were 4. State Party 2, were 4. Scattered 9, were 7.

U.G.G. Elects Officers

Officers recently elected by the local U.G.G. are: W. Sellers, Chairman; Wm Meade, Deputy Chairman; Com. W. W. Isbister, Mrs Todd and N. F. Marcy

Curling Club Elects Officers

A meeting of the Curling Club was held on Wednesday, Nov. 2nd, to elect officers for 1932-33.

Great enthusiasm was shown by the goodly number present and the following officers were elected to pilot the club through another successful season:

Hon. President: M. A. McTavish

President: W. A. Hurley

Vice-President: W. A. Todd

Secretary: A. V. Youell

Executive Committee: O. Nelson, Wm. Lee and N. Murray.

Draw Master: E. E. Jacques. Entertainment Committee: H. Johnson, R. B. Langley, E. V. Elford.

The fees this year have been set at \$5.00 and it is planned to start the season with a novelty B nspiel for which will be charged the sum of 35c. De tails will be announced later.

Anyone wishing to join in the Roarin' Game this winter or in the novelty 'spiel please get in touch with the executive or any of the above officers. This is your club. Come out of your hole this coming season and keep fit with a broom instead of medicine. (See Banner Hardware first—Advt.)

Watch for the notices of next meeting. Make it a point to be there. Our slogan for the coming season is: "A curl a day keeps the doctor away." Or should it be: "Causes divorce?" However, never mind, curl anyway and square it with the wife or sweetheart afterwards. More anon.

Thackeray Items

Sig Haug was hauling coal for the Acadia Produce Co. last week.

Mr. and Mrs. H. King were Youngstown visitors last week.

Carlson Bros. have cleaned up the threshing in this district. Some fair yields are reported, while others are very discouraging.

Carl Hodge made a record trip to the coal mines recently.

Ethan Hagey is hauling wheat for Franz Younggren & Sons.

Ernie Blagen is sporting a new Ford coach on the Chinook-Kinmundy mail route.

O. D. Harrington was hauling coal recently for the Heathdale School District.

In Loving Memory of Mother.

She bade no one a last fare well,
She said good bye to none;
The pearly gates were opened
And our precious Lord said:
"Come."

A precious one is gone,
A voice we loved is still,
A place is vacant in our hearts
Which never can be filled.

God, in his wisdom, He knew best,
So He took her home with Him to rest.

Who fell to sleep Nov. 10, 1931.

Fondly remembered by: Mr and Mrs. Geo. Christofferson and Mr. F. Dumanowski.

Will Probe West Coal Situation

(By Charles Bishop in Calgary Herald.)

Ottawa, Nov. 8.—Frederick McGregor, registrar under the Combines Act, is taking steps to ward a preliminary inquiry into the allegations that the western provinces are in the grip of a coal combine. Synchronizing with it Tuesday was the report of an investigation by the Dominion fuel board into charges that what coal consumers down this way have to pay is excessive.

The situation cerebri-ut was ventilated recently in the senate and to that body is going the report from the fuel board disclosing the fact that Welsh anthracite coal is laid down in Montreal at prices ranging from \$5.58 to \$9.80 a ton and that this same coal is costing consumers in Montreal, Toronto and Ottawa from \$12 to \$17 a ton. While the importers receive this coal at various prices, according to size, they sell it to Canadian wholesalers at practically one figure.

The preliminary survey in the west will determine whether a prima facie case is established to justify a commission under the Combines Act. Similarly the report just made by the fuel board will be considered in relation to further proceedings.

Heard Around Town

E. J. Anderson, B. Sc., Sight Specialist, will be at the Chinook Hotel on Tuesday, Nov. 15th.

The school van on Route 2, driven by Mr. Schmidt, met with an accident on Monday morning morning this week en route to the school, and a few reds, south of the railway track. A whiff-tree bolt broke allowing the neck yoke to come off the pole, dropping same to the ground. The team became unruly, and in turning away upset the rig. Virginia Dressel was slightly injured, and the driver suffered some slight bruises and abrasions.

Mr. and Mrs. Chapman and daughter Lorna, Mr. and Mrs. Vanhook and daughters and Mr. and Mrs. Berry were Sunday visitors at the home of Mr. and Mrs. J. Rennie, of Roslyn.

Dance at Clover Leaf School House Friday, Nov. 25th. Dancing at 9 p.m. Snappy music. Come and have a good time. Gents 35c, ladies bring cake.

Mr. H. F. Lensgraf left last week for Spokane, Wash., on a business trip.

W. W. Isbister left on Monday for Saskatoon where he will attend the United Grain Growers' convention as delegate from Chinook.

E. A. Kirkwood, teacher of violin, will be at Chinook each week on Saturday instead of

The Ladies' Aid of the United Church will hold a bazaar and chicken supper on Saturday Dec 3rd in the Banner Hardware. Supper; One price for all; 25 cents

The Ladies' Aid of the United Church plan to put on a bazaar and supper on Dec 3rd, in aid of the funds. Would these ladies kindly notify the president, Mrs. Lee, regarding there donations by November 26th?

Ladies' Card club held their usual meeting Tuesday evening at the home of Mrs. Lee. Honors of the evening were shared by Mrs. Robinson and Mrs. Murray. Club meets next week at the home of Mrs. N. Murray.

The Army & Navy Banquet at the Chinook Hotel Banquet Hall which will commence at 10 p.m. on Armistice Day is open to the

public, friends of Veterans. Mr.

Edward Kirkwood, F.T.C.M., is in charge of the Golden Wheat Orchestra, with A. Z. Weber, of cereal, at the piano. Reeve S. Warren is the chairman, and will start the banquet off with a toast to the King, following with other appropriate toasts. The musical programme is being arranged by the orchestra leader, Mr. Kirkwood, so, with a professional conductor in charge some real music may be expected by those in attendance.

Peyton School report came in too late for publication this week and will appear in next week's

Mr. and Mrs. Wm. Meade left last week for Bellevue where they will spend the winter months at the home of the former's butler, H. Meade.

The Ladies' Aid was held Wednesday afternoon at the home of Mrs. Todd. The meeting was opened by the president. The minutes of last meeting were read and approved. Arrangements were made for bazaar and supper.

Born—To Mr. and Mrs. E. E. Jacques on Wednesday, Nov. 9, a son.
